

INTEGRATED QUALITY AND ENVIRONMENTAL MANAGEMENT SYSTEM POLICY

The Management of IDM PIRINEO, a company dedicated to the design, the project management and the commercialization of equipment for the environment and industrial facilities, is aware of the importance of prioritizing the concepts on relation to the QUALITY AND ENVIRONMENT to guarantee competitiveness and continuous growth.

Therefore and considering the current tendency of the market and our desire for improving our service and products to our customers, and also to ensure the care of the environment, I have decided as General Director of the company, to integrate the Quality and Environmental Systems, defining the business strategy into the framework of Integrated Management, following the guidelines indicated in the standards UNE-EN ISO 9001: 2015 (Quality system) and UNE-EN ISO 14001:2015 (Environment system), considering the legal and regulatory requests of our customers.

For this idea, at IDM PIRINEO we keep the commitment to develop our Quality and Environmental Policy throughout the organization. This Policy is available to all interested parties also, for which we establish the following principles and commitments:

- To carry out a process of continuous improvement in all areas through the establishment and review of objectives (quantifiable and measurable) and goals, as well as manufacturing products with innovative technology.
- To get the requirements established by our customers.
- To assume the commitment for fulfilling all legal applicable requirements as well as other requirements that our organization could sign.
- To involve and motivate all IDM PIRINEO staff to get all workers are involved in the company, as well as their training, motivation and communication.
- To establish the pollution as one of our main objectives the prevention. To use material resources in a rational way and advance the saving of electrical energy and the production reduction of metallic and electronic waste.
- The application for measures to reduce risk, to provide our assets (people, media, facilities, communications, systems, etc.) in accordance with the risk analysis carried out and the levels accepted by the organization.
- To inform our employees, suppliers, collaborators and others in order to get that they understand and participate in our quality and environmental policy.
- We promote the mutual benefit in relation to the context and concerned parts to protect and improve the environment. We establish open communication channels in order to create synergies, to share experiences and best practices.

The IDM PIRINEO Management undertakes to support this policy for achieving the Quality and Environment objectives and goal.
